

# Press release

Lund, May, 2023

## Join Alfa Laval's Net-zero launch event #4 to find out how you could help accelerate the energy transition!

**Alfa Laval is back on the 15<sup>th</sup> of June to introduce new innovations and insights that have been designed to support sustainability in process applications. If you want to know how we can tackle some of the most pressing issues of our time, then Alfa Laval's Net-zero launch event is for you. This time, Alfa Laval will be introducing a new area within our three cornerstones: energy efficiency, clean energy, and circularity.**

*"We have so much to share with the world's industries in 2023 when it comes to sustainable solutions, so I am excited that we have a line-up of experts to talk about the many new launches we have to scale up and accelerate the energy transition. We will also have a guest joining us to discuss an exciting new partnership,"* says Thomas Møller, President of Alfa Laval's Energy Division.

Sustainability is at the heart of Alfa Laval's business offering for the energy market, with energy efficiency, clean energy, and circularity at the centre of how Alfa Laval can support their customers all over the world. "We think it is important to build lasting partnerships," continues Møller, "because we know that understanding our customers' businesses is vital when helping them transition away from the carbon economy and toward greater thermal efficiency. Trying to solve their challenges is what sparks our imagination and drives us toward greater innovation."

Alfa Laval is home to the latest thinking around innovative technologies that boost profits, cut costs, and improve sustainability. This event is set to summarize seven key examples that benefit industries across the entire energy market.

So, if you want to be part of building a brighter future, you won't want to miss Alfa Laval's Net-zero launch event on the 15<sup>th</sup> of June 2023 at 14.00 CET.

## Programme

### Opening

Thomas Møller, President Energy Division, Alfa Laval

### Energy efficiency

#### **Introducing the Alfa Laval AC900**

The next-generation, single-circuit brazed plate heat exchanger specially designed for low-density refrigerants in air conditioning and industrial heat pump applications.

### **No.1 in Spirals**

Alfa Laval is a trademark registered and owned by Alfa Laval Corporate AB. Alfa Laval reserves the right to change specifications without prior notification.

Alfa Laval was the first company to bring spiral technology into the world of heat transfer and we are still number one today. Find out where this technology will take us tomorrow.

### **Extreme heat recovery with the Alfa Laval GHR**

Approximately, 22% of heat from exhaust gases from engines, and gas turbines are getting wasted if we don't recover it. Tune in to find out how.

### Clean energy

#### **Launching AlfaLaval HyDuo - Cooling and water purification in one go**

Eliminate the need for tradition desalination and cooling with the ground-breaking Green hydrogen solution.

### **Energy and Green Hydrogen are precious - Let's make them count.**

We offer the most efficient and scalable heat transfer solution for electrolyser OEMs and green hydrogen-based industries to maximize energy efficiency.

### Circularity

#### **Zero Liquid Discharge - Reuse water, recover value.**

Alfa Laval is leading the industry with customisable zero liquid discharge solutions. Now we have taken the next step to make it even more accessible.

### **Fossil-free steel, SSAB, and Concept Zero**

Concept Zero is Alfa Laval's new initiative to produce the world's first carbon neutral heat exchanger by 2030. SSAB will join us in the studio to explain how they can help.

### **Editor's notes**

#### **This is Alfa Laval**

Alfa Laval is a world leader in heat transfer, centrifugal separation and fluid handling, and is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day.

Alfa Laval has 20,300 employees. Annual sales in 2022 were SEK 52.1 billion (approx. EUR 4.9 billion). The company is listed on Nasdaq Stockholm.
